

December 8, 2020

Dear parents, caregivers, and guardians,

I am writing to inform you that a member in our North Pembroke Elementary School community and two members in our Pembroke High School community have tested positive for COVID-19. Our first responsibility is to keep our students and staff safe. We have been planning for this scenario during our reopening planning process and have a comprehensive plan in place to sanitize the school, inform families whose students were at risk of exposure or in close contact, and support the affected families as they navigate this stressful experience.

Our student body and staff have been closely adhering to the safety protocols including mask wearing, hand washing, and physical distancing. We are grateful to our families for their continued efforts to keep students home at the first sign of symptoms. These measures, taken in combination, greatly reduce the risk of additional transmission. We also want to assure you that the individual that tested positive was not present at school during their infectious period as defined by the CDC.

Though we cannot provide specific information about our school community member who tested positive, at this time, any school based close contacts have been notified by our public health staff, this includes our school nurses, health agent as well as the community tracing project. Please continue to monitor your child for symptoms and keep your child home if he/she/they shows any symptoms or is not feeling well.

Determination and notification of close contacts is done by the state or local Contact Tracing team, individuals deemed close contacts, will be notified privately. Those close contacts should be tested but must self-quarantine for 14 days after the last exposure to the person who tested positive, regardless of test result. We are also following all Department of Health protocols, including collaborating with our local board of health to complete contact tracing. Additionally, we are asking those parents whose students are tested for COVID-19 to please report the results to the school nurse. We are working hard to understand the impact of the virus on our school community and this information is a critical piece of that puzzle.

To further prevent transmission of the virus to other staff and students, we have sanitized the school with a focus on those areas frequented by the community member that tested positive. We will continue to be vigilant in adhering to all of the protocols that have been put in place in an effort to continue in person learning. We are also providing remote learning for all students required to quarantine at home to continue to provide instruction, structure, and an emotional connection to the classroom during a time that we know will be challenging for those children

Our Mission: To ensure student achievement through excellence in teaching and learning.

and families involved. We have been sharing remote learning options with students in advance of our first positive case in hopes that they will understand that this process is designed to keep everyone in our community safe, as opposed to assuming that they have contracted the virus.

For more information on COVID-19 symptoms and testing, visit: <https://www.mass.gov/info-details/about-covid-19-testing#where-can-get-a-test?>.

You can also find a map of testing sites at

<https://memamaps.maps.arcgis.com/apps/webappviewer/index.html?id=eba3f0395451430b9f631cb095febf13>. Please contact us immediately should you or someone in your home begin to show symptoms.

We are committed to continuous communication with and support of our families. If you have any additional questions or concerns, please contact either myself or Lisa Cullity. If there is additional transmission as a result of this case or a separate case, we will send out another message immediately. Thank you for your continued support.

Sincerely,

Erin Obey
